BENSON NGUGI

Video Editor & IT Undergraduate (Backend & Cybersecurity Specialist)

Location: Meru, Kenya **Phone:** +254 741 438 856 **Email:** ngugibenson@proton.me **GitHub:** github.com/enmessara

PROFESSIONAL SUMMARY

Creative and detail-oriented **Video Editor** and Information Technology student at Meru University of Science and Technology (2024–2028). Specializing in video post-production, timeline management, color grading, audio mixing, and visual storytelling. Complemented by technical expertise in **Python Backend Development** and **Offensive Cybersecurity / Web Penetration Testing**, bringing a unique technical edge to digital media workflows, content security, and video processing.

CORE COMPETENCIES & TECHNICAL SKILLSETS

Video Editing & Post-Production (Primary)
Timeline editing, seamless transitions, audio balancing, color correction, motion graphics basics, multi-format rendering & pacing.

Creative Software & Tools
Premiere Pro, DaVinci Resolve, CapCut Pro, Photoshop, Audition, multi-track audio editing tools.

Backend Development
Python scripting, system automation, RESTful APIs, Git/GitHub version control workflows.

Cybersecurity & Web Pentesting
Offensive security fundamentals, OWASP Top 10 analysis, vulnerability scanning, Kali Linux, Burp Suite.

EXPERIENCE & KEY PROJECTS

Freelance Video Editor & Post-Production Specialist

Freelance / Content Production

- Assembled, trimmed, and edited raw footage into high-engagement video assets optimized for web, social platforms, and digital campaigns.
- Applied audio noise reduction, soundtrack mixing, precise cuts, color grading, and graphic overlays to enhance production value.
- Managed end-to-end rendering workflows and format conversions tailored for varied platform specifications.

Python Backend & Automation Scripting

Independent Projects

- Developed Python automation scripts for media file handling, batch renaming, and data processing.
- Maintained open-source projects and code repositories on GitHub (`github.com/enmessara`).

Web Penetration Testing & Security Research

Practical Labs

- Conducted vulnerability assessments for web security flaws (XSS, SQLi, Access Control) using Kali Linux and Burp Suite.

EDUCATION

Meru University of Science and Technology

2024 – 2028 (Expected Graduation)

Bachelor of Science in Information Technology

- Coursework focus: Multimedia Systems, Web Engineering, Database Systems, Network Security, Programming in Python.
